

ELEVENTH INTERNATIONAL CONFERENCE ON
ANTIMICROBIAL AGENTS IN VETERINARY MEDICINE (AAVM)

September 11-14, 2022 Madrid, Spain

Dr. Fatima M'zali is head of R&D of a Bordeaux University Teaching Hospitals Microbiology platform, specializing in clinical microbiology (human and veterinary), at the interface between fundamental research and the industrial field. She has recently set up various collaborative projects in the context of the One Health Concept.

Dr. M'zali was formerly, a clinical microbiologist in a UK hospital trust.

She has been working on antimicrobial resistance emergence and dissemination for more than 20 years, focusing on the development of novel diagnostic tools in order to tailor the empirical antimicrobial therapy for critical patients together with assessing novel antimicrobial compounds.
